HIGHLIGHTS – MARCH 2023

- Fifty-seven international airlines operated scheduled services to/from Australia during the month (includes four dedicated freight airlines but excludes airlines operating only via code share arrangements).
- International scheduled passenger traffic in March 2023 was 2.646 million. International passenger traffic continues to recover from the COVID-19 pandemic. Passenger traffic was 698,111 in March 2022 and 1.726 million in March 2020.
- Passenger traffic for the year ended March 2023 was 25.533 million which is a 37.1 per cent decrease over the figure for the year ended March 2020 (40.579 million). Passenger traffic in the year ended March 2022 was 2.955 million.
- Total seats made available on international scheduled operations to/from Australia during March 2023 were 3.396 million – an increase of 15.9 per cent compared to March 2020. The overall seat utilisation percentage was 61.1 per cent in March 2020 and 58.8 per cent in March 2022. It has increased to 80.8 per cent in March 2023.
- In terms of passenger carriage, Qantas Airways had the largest share of the market in March 2023 with 17.6 per cent of the total followed by Jetstar with 10.9 per cent, Singapore Airlines with 10.4 per cent, Air New Zealand with 8.5 per cent and Emirates with 6.2 per cent.
- The Qantas group – Qantas Airways and Jetstar accounted for 28.6 per cent of total passenger carriage in March 2023. The group's share was 18.1 per cent in March 2022 and 27.9 per cent in March 2020.
- Australian designated airlines – Qantas Airways, Jetstar and Virgin Australia (2.9 per cent) accounted for 31.5 per cent of total passenger carriage in March 2023. Their share was 18.2 per cent in March 2022 and 35.3 per cent in March 2020.
- Low Cost Carrier (LCCs) AirAsia X, Cebu Pacific Air, Indonesia AirAsia, Jetstar, Scoot Tigerair, Thai AirAsia X and T'Way Air accounted for 18.3 per cent of total international passenger traffic to/from Australia in March 2023. The Low Cost Carriers' share in March 2022 was 6.0 per cent and 14.1 per cent in March 2020.
- International scheduled freight traffic in March 2023 decreased by 11.5 per cent over March 2022 to 77,479 tonnes. Inbound freight traffic decreased by 16.1 per cent and outbound freight traffic decreased by 5.0 per cent compared to March 2022. International scheduled freight traffic in March 2020 was 80,450 tonnes.
- Figures for 2020-2022 were impacted by the COVID-19 travel restrictions. International travel has been rapidly trending towards its pre-COVID numbers, which means many airlines are re-entering the market and many are expanding their routes. This has led to some delays in our surveys, as we have had to re-establish relationships with airlines who provide data and the increase in routes requires more data checking and confirmation.

Please refer to explanatory notes - paragraphs 4, 5, and 7 in particular.

Seat Factors shown in this table:

Traffic shown in this table for AirAsia X, China Airlines, Emirates, Qantas Airways and Qatar Airways may differ from traffic shown in Tables 1 and 2 because of the inclusion in this table of total traffic into and ex Australia (for seat factor purposes) whereas Tables 1 and 2 include uplift/discharge traffic only. All other airlines report uplift/discharge traffic only. Currently, there are no other airlines operating via Australia, and therefore uplift/discharge traffic is the same as total traffic into and ex Australia for all other airlines.

Available seats have not been counted where passenger aircraft have been used to operate freight only services. However, this adjustment cannot be made for airlines that report monthly aggregates and that have operated a mix of passenger and freight only services using passenger aircraft.

(a) Freight flights only.

**TABLE 6 INTERNATIONAL AIRLINES OWN STOPOVER REVENUE PASSENGERS,
AUSTRALIAN CITY PAIRS: March 2023**

City Pair Route	Total Passengers
TOTAL	0

Notes:

1. Own Stopover Revenue Passengers: The aggregate of revenue passengers uplifted at one Australian airport and discharged (excluding transit passengers) at another Australian airport by the same foreign registered international airline on which they entered or left Australia.
2. City Pair Route represents the aggregation of passengers travelling in both directions.
3. This data is additional to the information presented in tables 1-5 which cover only those passengers travelling to/from overseas airports.

(a) Scheduled passenger services recommenced April 2021.

(b) Seasonal services only.

(c) Scheduled services recommenced September 2019.

(d) No scheduled passenger services after March 2020.

Operations at several airports have been suspended during COVID-19

EXPLANATORY NOTES

INTRODUCTION

1. This publication continues the series of monthly publications presenting provisional statistical information on the scheduled operations of international airlines operating into/out of Australia.
2. The figures in this publication were obtained from reports submitted by scheduled international carriers and are the best available at the time of publication.

COVERAGE

3. These statistics show uplift/discharge data – These data detail, by direction, the revenue traffic between the actual points of uplift and discharge within each flight, aggregated for all flights within the period. It shows the movement of traffic between two airports not necessarily directly connected but within the same flight number. Typically, flight numbers change when an aircraft reaches its home country. This means that uplift/discharge data for the port in the operator's home country are likely to be overstated by traffic whose origin/destination point is beyond that port. For example, uplift/discharge traffic reported in this publication as Singapore could include traffic whose origin/destination is Europe.
4. These statistics cover revenue traffic carried by the operators of scheduled regular public international air transport services only and do not include charter traffic.
5. Flights with no revenue traffic uplifted from Australia or discharged in Australia are treated as positioning flights and are not included in this data collection. This mainly affects dedicated freighter flights where some flights outbound from Australia do not pick up freight in Australia.

PRODUCTION AND INTERPRETATION

6. Tables 1 and 2 show the country of the relevant uplift or discharge port served by that airline. For example, traffic uplifted/discharged between Sydney and Singapore by British Airways would be shown as Singapore traffic in Tables 1 and 2.
7. Table 3 shows figures for the country of service (or route) for each airline and therefore may not equate to the data in Tables 1 and 2. For example, the British Airways UK service identified in Table 3 could include passengers uplifted or discharged in Singapore as well as the UK; these passengers would be shown individually under those countries in Tables 1 and 2. The difference in treatment of data between Tables 1 and 2 and Table 3 is necessary in order to work out a meaningful Seat Utilisation figure for Table 3.

Figures shown in Table 3 may include total traffic into and out of Australia for airlines that fly through Australia (also necessary in order to work out a meaningful Seat Utilisation figure). Therefore, figures in Table 3 may not equate to figures in Tables 1 and 2. For example, passengers carried by Qantas Airways from New Zealand via Australia to the UK will be included in Table 3 but will not be included in Tables 1 or 2 as these passengers were not uplifted/discharged in Australia.

8. Table 5 – shows uplift/discharge passenger and freight data for city pairs with “same flight number” international flight connections.

9. Where figures have been rounded, discrepancies may occur between sums of component items and totals, and in percentage changes which are derived from figures prior to rounding.
10. Published figures may be revised where figures missing at the time of publication are received or misreporting/miscalculation necessitates revisions.

DEFINITIONS

11. The following definitions have been used in this publication:
 - (a) Aircraft Movement: A landing or a take off.
 - (b) Freight: The aggregate of all revenue freight uplifted or discharged in Australia.
 - (c) Inbound: Inbound to Australia/Australian international airport.
 - (d) Mail: The aggregate of all mail uplifted or discharged in Australia.
 - (e) Outbound: Outbound from Australia/Australian international airport.
 - (f) Revenue Passengers: please refer to paragraph 12.
 - (g) Seat Utilisation: The ratio of passengers carried to seats available, expressed as a percentage.
 - (h) Seats Available: Generally based on standard aircraft configuration, the aggregate of seats available on all flights operated over a particular service.
 - (i) Services: Scheduled flights over authorised routes which are listed according to the main ports involved.

SYMBOLS AND OTHER USAGE

- nil or zero
- .. not applicable

DATA ISSUES

During the period impacted by the COVID-19 pandemic, airlines that normally would only operate scheduled air services could also operate charter air services and where charter air services are not clearly identified, they may be included in the data in this publication.

Seat utilisation: Available seats have not been counted where passenger aircraft have been used to operate freight only services. However, this adjustment cannot be made for airlines that report monthly aggregates and that have operated a mix of passenger and freight only services using passenger aircraft.

NOTES ON AIRLINE SERVICES

The airlines below had suspended services to and from Australia in March 2023:

Citilink Indonesia,
Donghai Airlines,
Hainan Airlines,
Hong Kong Airlines,
Jetstar Asia,
Pacific Air Express,
Polar Air Cargo,
Samoa Airways,
Silk Air,
South African Airways.
